Subject: Force Broadband Internet Update - Final Stages!!!  
To: <[contact@forcebb.com](mailto:contact@forcebb.com)>

Hello and Happy Friday,

100% of the main line fiber splicing has been completed with just a handful of additional splice cases to be added when needed based on those who want service!!! We are in the final stages!!!

To that, as we get closer to turning up service at your location, I wanted to reach out to provide all the service options for you to review before scheduling your drop or installation.

**Force Broadband Monthly Internet Options:**

100Mbps download / 100Mbps upload - \$50  
300Mbps download / 300Mbps upload - \$70  
Gigabit download / Gigabit upload - \$90

**Fiber Connection to your home**

Grant Addresses - No Cost - Drop Buried by ForceBB or ForceBB Contractors.  
Non-Grant Addresses - \$500 - Drop placed on the ground and fully spliced.

If you would like the line buried you are welcome to bury it yourself, hire someone, we can provide contractor's information, and you can go through us as well at \$1.50/foot plus any boring costs to get under driveways or paved surfaces.

For the Non-Grant addresses, the \$500 activation will be due prior to our technicians coming out to run the wire to the home. Any burial costs if you choose to have us bury the line won't be due until after the burying is complete.

**Standard Installation - \$75**

ForceBB Tech will test connection onsite and provide a CAT6 handoff or cable that customers can use to connect directly to their own router and or network switch.

Best for customers who already have a router set up and know how to access their own router settings and are ok with resolving WiFi issues when they arise.

or

**Network Installation - \$150**

ForceBB Tech will assist in configuring customer owned routers and or customers existing routers. Tech will also assist in connecting up to 3 wireless items to the WiFi and provide the network SSID and Password to customers.

Best for customers who want to manage their own Wifi network settings and Wifi issues as they arise but just appreciate a little help getting it all set up.

or

**Managed Router Options - Monthly Cost for Wifi Equipment and Management**

Wifi 5 - \$9 Router/ \$6 Additional Mesh Puck - Great for customers on 100Mbps or 300Mbps speed packages (covers approximately 1500 sq ft per puck).

Wifi 6 - \$12 Router / \$9 Additional Mesh Puck - Great for customers on 300Mbps and 1GIG speed packages (covers approximately 1500 sq ft per puck).

Best for customers who want someone to assist with Wifi issues when they arise.

The homes are Filings 3,4 and 5 are almost 100% live with working service if you want to check in with folks in your community who already have our service.

**Grant Map - GREEN - Included In Grant / RED- Not included in Grant**

Our grant application utilized the advertised speeds of CenturyLink and specific address service availability provided from Comcast and removed all addresses that had 25Mbps/3Mbps or greater advertised as available.

Please let me know if you have any questions.

Best Regards,  
Geoff
